

MEDICAL ASSISTANT

The Institute's Medical Assistant program has an overall objective to prepare the student for an entry level position in the medical field with an emphasis on both clinical and administrative procedures. Students will learn to perform routine administrative and clinical tasks to keep health care delivery settings running smoothly. An externship at the end of the program puts what the students have learned into practice in an actual medical facility and may lead to employment in the field.

Standard Occupational Classification (SOC) 31-9092, 31-9097
